Comprehensive Intervention and Instruction

Istation Español's authentic Spanish literacy intervention and instruction enhance learning through purposeful activities with Latin culture and literature. Young learners' skills are assessed in Spanish through engaging, computer-adaptive activities. Students are then seamlessly placed into high-interest, interactive online instruction.

As students progress through the interactive instructional cycles, they have multiple opportunities to engage with a variety of texts with increasing complexity across genres. Struggling students are routed through reteach lessons, and teachers are given instant reports to monitor student progress. Each Priority Report directs teachers to specific skills-based, small-group lessons for targeted intervention. Additionally, each instructional cycle contains multiple teacher-directed lessons for further instructional differentiation and support.

Giving Teachers More Time to Teach and Students the Instruction They Need When They Need It

Interactive lessons, read-alouds, digital books, real-time reports, and Istation's other all-inclusive tools support all levels of instruction for all student abilities. For developing to established learners, Istation supports intervention, development, and accelerated learning.

ISIP™ Subtests

Students begin with an assigned set of grade-based assessments. More or less challenging subtests will be added based on each student's estimated overall reading ability score.

Lexile® Measures to Connect Students with Reading Materials

Schools get up-to-date Lexile reading measures for students based on their performance on Istation's Indicators of Progress (ISIP™) assessments. Interactive books and reading passages are correlated to Lexile reading measures. Searching beyond Istation's digital library of reading materials, the Lexile Find a Book feature screens and filters books according to Lexile measure along with genre, reading interest, and more.
